System Error Affecting Q1 Trial Times Summary – Wednesday, 7 January 2026

The Queensland Greyhound Racing Club (QGRC) advises that due to a system configuration error, the overall trial times summary for the Q1 Trials held on Wednesday, 7 January 2026, was unable to be exported and published.

Following an investigation with Brook Group, it was determined that the issue occurred because trials were conducted on the Q Straight that morning, resulting in the system not being configured to record the evening's overall summary. While the semaphore board displayed accurate data throughout the trials and tickets were issued for each individual trial, the end-of-session summary report—normally uploaded to the Club website—could not be generated.

The Club apologises for any inconvenience caused and appreciates the understanding of participants.
